

How to record shows and movies with my Stream TV PVR and OnePass?

OnePass finds and saves all the episodes of a series available from your PVR recordings, on demand shows and streaming services (such as Netflix), and puts them together under My Shows in a list.

To record a show or movie from the guide:

- Highlight the show or movie you want to record - Press the info  button and choose either to record this show/movie or create OnePass which will give you the option to record the entire season of a TV series. Please see [OnePass](#) for more details.

To record directly from a live show or movie:

- Press the info  button then select either to record or create OnePass.

Hint: To find all your recordings, press the TiVo  button then select My Shows. Please see [My Shows](#) to learn more.
