

Troubleshooting: Unable To Make Calls From My Phone

If you're having trouble making phone calls or have no dial tone, please attempt the following:

- Check out our [no dial tone tips](#) if you can't make or receive calls.
- Plug a working corded phone into different jacks to make sure a malfunctioning phone or jack isn't causing the issue.
- If your calling long distance, make sure you dial a **1** before the area code.

If the issue isn't resolved, please contact our Technical Support Team at [1-866-832-6020](tel:1-866-832-6020)
